Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Application No. Applicant(s) 10/541,377 AUTIER ET AL. Office Action Summary Examiner Art Unit Alicia R. Hughes 1614 -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS. WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status 1) Responsive to communication(s) filed on 02 November 2007. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) 16.27.28 and 30-46 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) _____ is/are allowed. 6) Claim(s) 16, 27-28, and 30-46 is/are rejected. 7) Claim(s) _____ is/are objected to. 8) Claim(s) _____ are subject to restriction and/or election requirement. Application Papers 9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are; a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abevance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152. Priority under 35 U.S.C. § 119 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. DETAILED ACTION

Status of the Claims

Claims 16, 27-28, and 30-46 are pending and the subject of this Office Action. Applicant cancelled claims 1-15 and 17-21 in the response filed on 02 November 2007.

Applicants' arguments filed on 02 November 2007 have been fully considered and are, in part, deemed to be persuasive regarding the previous rejection. Rejections not reiterated from this Office's previous action are hereby withdrawn. The rejections set forth herein constitute the complete set of rejections being applied to the instant application presently.

Claim Rejections - 35 U.S.C. §112.2

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

First 112, Second Paragraph Rejection

Claims 40-43 are rejected under 35 U.S.C. 112, second paragraph, for indefiniteness.

Claim 40 is drawn to "a prodrug of one of the following compounds." The term "prodrug" is a relative term which renders the claim indefinite. In particular, "prodrug" does not particularly point out the degree or type of derivation that a given compound may have in relation to the parent compound and still be considered a "prodrug" as intended by Applicants. Applicants have failed to provide any specific definition for this term in the present specification. Lacking such a definition, the skilled artisan would not be reasonably apprised of the metes and

Application/Control Number:

10/541,377 Art Unit: 1614

10/541 377

bounds of the subject matter for which the Applicants seek patent protection. Rather, a

Page 3

subjective interpretation of the claimed language would be required. However, as such is

deemed inconsistent with the tenor and express language of 35 U.S.C. §112.1, second paragraph.

the claims are deemed properly denied.

Second 112, Second Paragraph Rejection

Claims 36-39 and 44-46 are rejected under 35 U.S.C. 112, second paragraph, for

indefiniteness. The claims recite the limitation "[a] method according to claim 34." There is

insufficient antecedent basis for this limitation in the claims, because claim 34 is not drawn to a

method, but rather to a composition.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine

grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible

harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection

is appropriate where the conflicting claims are not identical, but at least one examined

application claim is not patentably distinct from the reference claim(s) because the examined

application claim is either anticipated by, or would have been obvious over, the reference

claim(s). See, e.g., In re Berg, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); In re

Goodman, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); In re Longi, 759 F.2d 887, 225

Art Unit: 1614

Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163

USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may

be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the

scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal

disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR

3.73(b).

Claims 16, 27-28, and 30-46 are provisionally rejected on the ground of nonstatutory

obviousness-type double patenting as being unpatentable over claims 1-14, 28-29, 33, and 55-56

of U.S. Patent Application No. 10/541,493. Although the conflicting claims are not identical,

they are not patentably distinct from each other, because they contain overlapping/closely related

subject matter, most notably, the treatment of diabetes and related complications by

administering to a patient in need thereof a kynurenine 3-hydroxylase inhibitor.

Applicant has noted that the '493 application does not teach or suggest the specific

compounds in the present set of claims and therefore, the obvious-type double patenting rejection

should be withdrawn. To the contrary, it is well-understood in art that an obvious-type double

patenting rejection does not require anticipation, but rather, a show of a prima facie case of

obviousness, which has been established based on the administration of a kynurenine 3-

Application/Control Number:

10/541.377 Art Unit: 1614

hydroxylase inhibitor, and some with the same core structure as claimed in the instant

Page 5

application.

In view of the foregoing, the above rejection is proper.

Claim Rejections - 35 U.S.C. §103(a)

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made. This application currently names joint inventors. In considering patentability of the

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in

claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various

claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out

the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c)

and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 16, 27-28, and 30-46 are rejected under 35 U.S.C. §103(a) as being obvious over

U.S. Patent No. 6.323,240 B1 [hereinafter referred to as "Giordani et al"] in view of U.S. Patent

No. 6.572.542 [hereinafter referred to as "Houben et al"].

Art Unit: 1614

Giordani et al teach a class of 4-phenyl-4-oxobutanoic acid derivatives and their pharmaceutically acceptable salts (Abstract) with a core structure that encompasses the core structure of the present invention useful in the treatment of glaucoma/retinopathy (Col. 3, lines 4-20). Giordani et al also teach that the 4-phenyl-4-oxobutanoic acid derivatives are used as a kynurenine-3-hydroxylase inhibitor (Col. 3, lines 4-5). It is well understood in the art that retinopathy is a known complication associated with diabetes. (Houben et al, Col. 1, lines 38-67; see also Diabetes Research Foundation, "Diabetes and Your Eyesight," printed from http://www.glaucoma.org/learn/diabetes and yo.html, 2 pages).\frac{1}{2}

Page 6

More specifically, as with the present invention, Giordani et al disclose the following

Accordingly, the present invention provides a 4-phenyl-4-con-butanosc acid derivative of framula (I) either as a single isomer or as mixture of isomers

wherein

X. Y and Z sre, each independently, hydrogen, halogen, cyano, nitro, C₁-C₆ alkyl, phenyl, benryl, C₆-C, alkonyl, C₂-C₆ alkynyl, C₁-C₆ allowy or C₁-C₆ skythio;

R is hydroxy; —OR, in which R, is $C_1 - C_2$ sikel, phench, boxyl, $C_2 - C_3$ sikenyl of $C_2 - C_4$ sikyayl; — $N(R_0)_2$ or $-N(R_0)OR_2$ in which each R_0 is, independently, bidrogen, $C_1 - C_2$ sikyi, $C_2 - C_4$ sikenyl, $C_2 - C_4$ sikynyl, phenyl or bearcyl;

 R_1 , R_0 , R_{λ} and R_0 are, each independently, hydrogen, hydroxy, thiof, C_1 , C_{λ} alkoxy, C_1 , C_{λ} alkylthio, C_1 , C_{λ} alkyl, C_2 , alkoyl, phenyl or benzyl, or

R₁ and R₂ or R₂ and R₃ regulater form a group ~~CHR₆ in which R₈ is hydrogen, a straight C₁-C₅ alkyl chain or phonyl;

(Col. 2, lines 38-67) and

Cited on previous PTO-892 form,

Application/Control Number:

10/541,377

Art Unit: 1614

In the present invention, R1 may represent a heterocyclic radical, which could be identical to

the phenyl ring disclosed in Goirdani et al. The present invention's R2 is the equivalent of

Giordani's R², and the present invention's R³ is the equivalent of Girodani's R⁴. According to

Giordani, both its R² and R⁴, just as its R³ and R¹, can be hydrogen, halogen, thiol, alkenyl,

alkoxy, etc., just as the present invention's R² and R³ positions can be the same. The present

invention's W represents a divalent radical which is the equivalent to the cycloalkyl formed in

Giordani et al that includes R¹ and R³, and finally, R⁴ in the present invention, which is the

equivalent of R in Giordani et al, can both be, for example, a heterocyclic ring or an alkenyl or

alkyl.

In light of the foregoing, it would have been prima facie obvious to one of ordinary skill in

the art to utilize the administration of a 4-phenyl-4-oxobutanoic acid derivatives used as a

kynurenine-3-hydroxylase inhibitor as a method of treating diabetes and associated

complications.

Conclusion

No claims are allowed.

Applicants' amendment necessitated the new ground(s) of rejection presented in this

Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: Page 8

10/541,377 Art Unit: 1614

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Alicia Hughes whose telephone number is 571-272-6026. The

examiner can normally be reached from 9:00 AM to 5:00 PM, Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Ardin Marschel, can be reached at 571-272-0718. The fax number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR of Public PAIR. Status information for unpublished

applications is available through Public PAIR only. For information about the PAIR system, see

http://pair-direct-uspto.gov. Should you have questions on access to the Private PAIR system,
